Tailored Master’s Programme in Educational Leadership

We offer you

• **The necessary competencies** for leading the human and technological changes faced by educational institutions.

• **Direct personal contacts** and deeper insight into the successful Finnish education system so as to transfer best practices to your environment.

• **Practical tools and theories** about motivating and leading yourself and other educators effectively and ethically.

• **Benefit from our authentic learning approach**, where all courses are designed to help you with your own development task, your Master’s Thesis.

Career opportunities

Graduates qualify for **leading positions in the field of education in multicultural environments**. The degree provides graduates with the abilities and skills to work in governmental organisations, Ministries of Education and global NGO’s.

**Become a 21st century leader in education**

The Master’s Degree in Educational Leadership is a professional **higher education degree. Tailored programme for groups of 20-30 participants.** (individual intake thru www.tuni.fi/en)

The degree is focused on leadership and management with a specialisation of applying contemporary leadership skills in the context of education.

It enables graduates to change and reform educational policy and practices in their own country in international settings.

The programme is organised mainly online - **with brilliant intensive weeks in Finland.**
